

## What is Smart IIoT Sync?

Smart-IIoT Sync is the heart of our cloud-based online, on-demand monitoring service that minimizes wait and risk of data inaccuracy. Smart Fuel Intelligence & Smart Oil Intelligence with SFS-1 Particle Monitor along with many other sensors connected to the Smart-IIoT cloud-based condition monitoring platform eliminates the human element and middlemen. Smart-IIoT provides insights into the fluid cleanliness and monitors filter pressure drop data from any location, to ensure greater process and operational uptime for higher productivity. It takes the guesswork out of your maintenance planning and helps prevent unexpected downtime.
